Fatehdeep Singh Walla

has successfully completed the online Specialization

Object-Oriented Analysis & Design

This specialization explores essential patterns, principles, and practices for effective object-oriented design and analysis. You practiced how to translate real-world problems and requirements into robust technical solutions, and design code that is resilient, testable, reliable, and maintainable. Through hands-on programming challenges and deep technical exploration, you gained practical experience in developing high-quality software. You used Java and UML to design and implement solutions that meet user needs and stand up to change, preparing you to deliver professional-grade software in real-world environments.

Bruce R. Montgomery,
PhD, PMP
Sr. Instructor
Electrical, Computer,
and Energy Engineering
University of Colorado
Boulder

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
